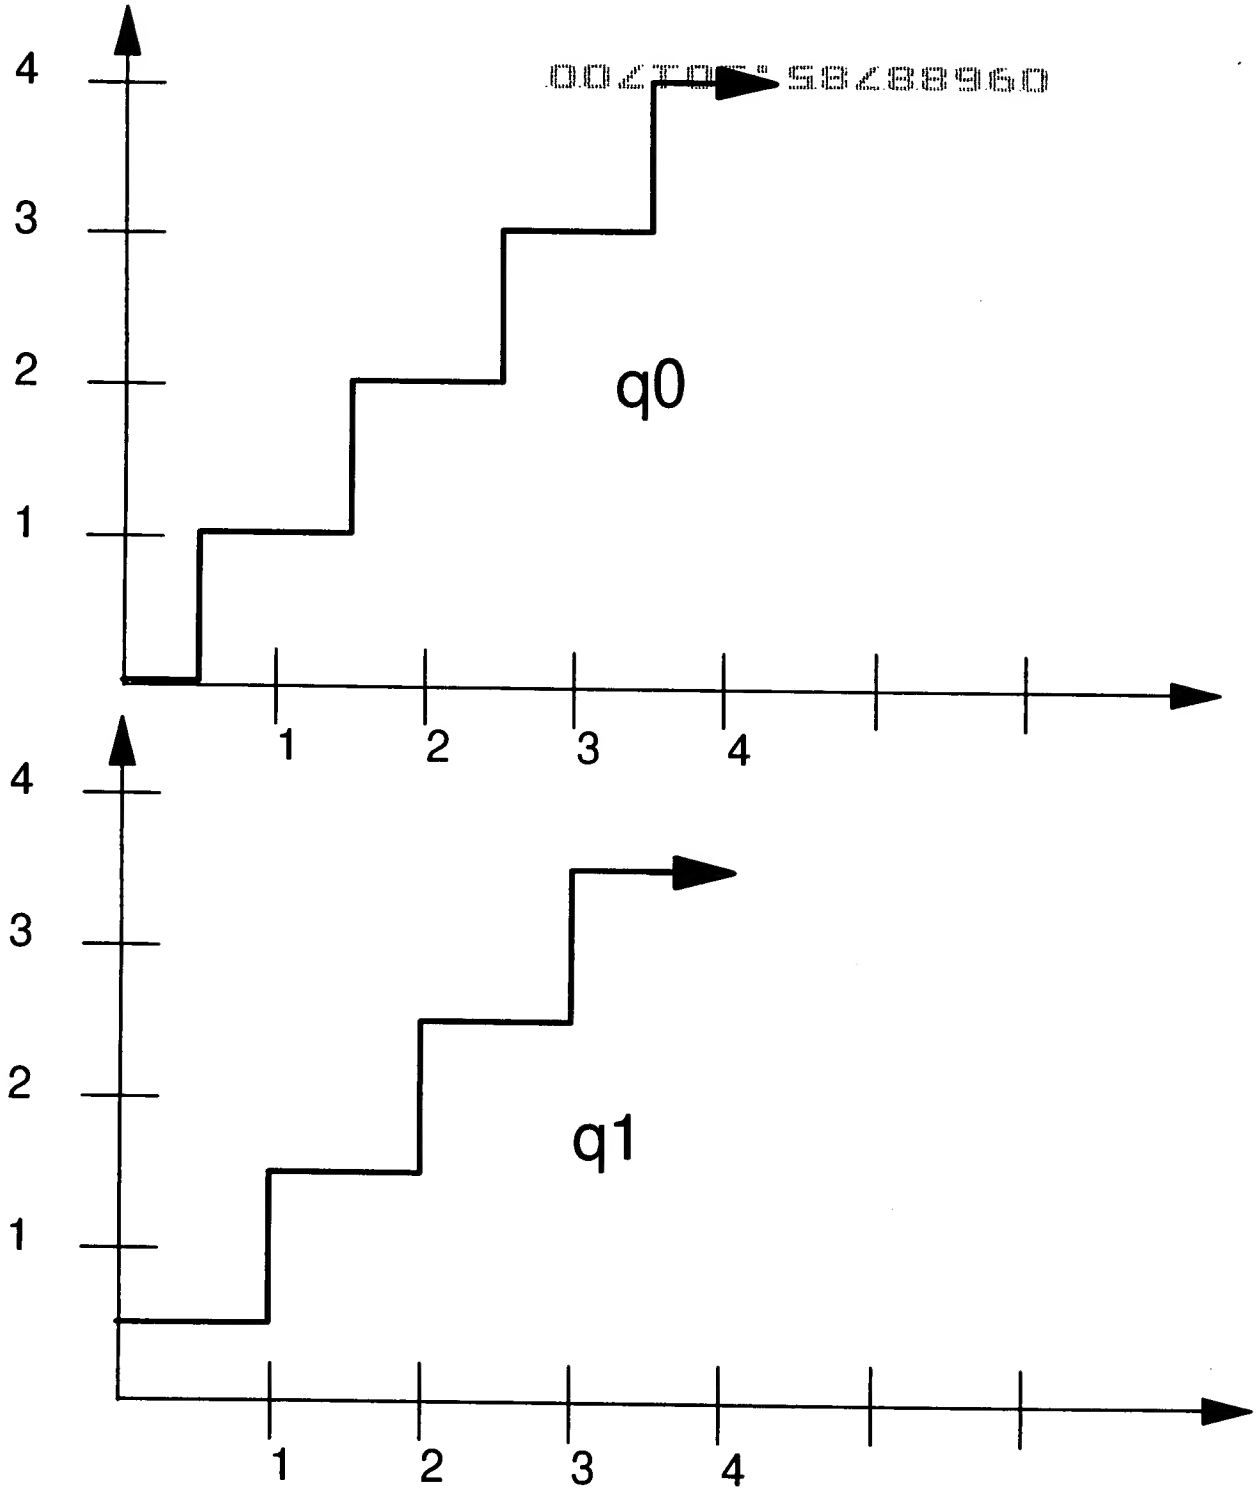

Figure 4

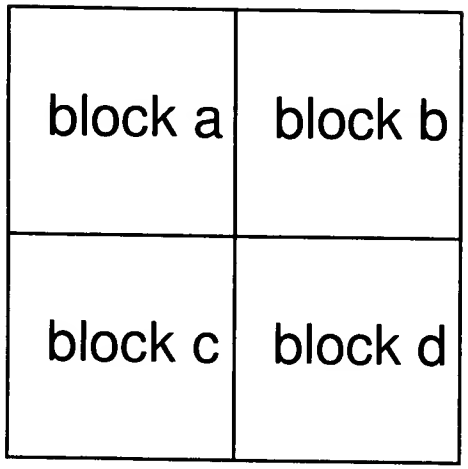
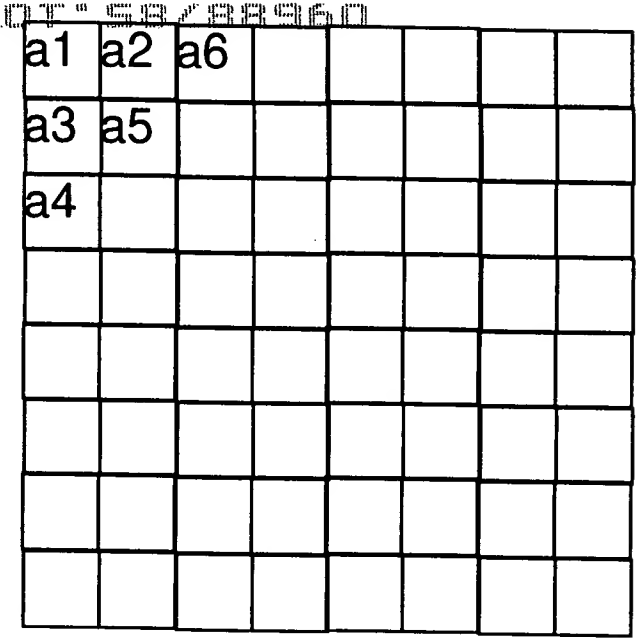
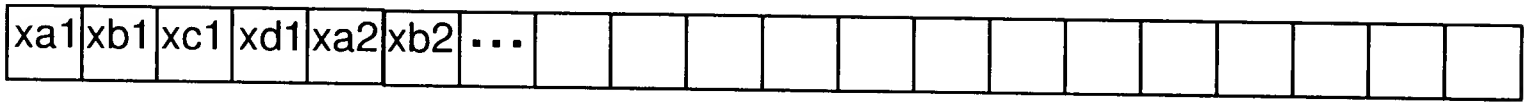


Image



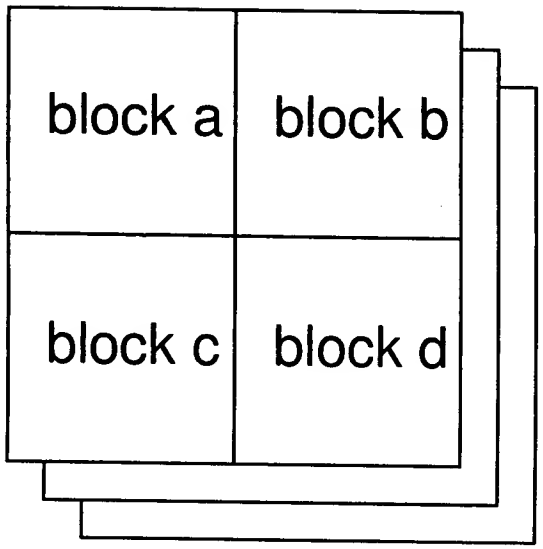
DCT coefficients of block a



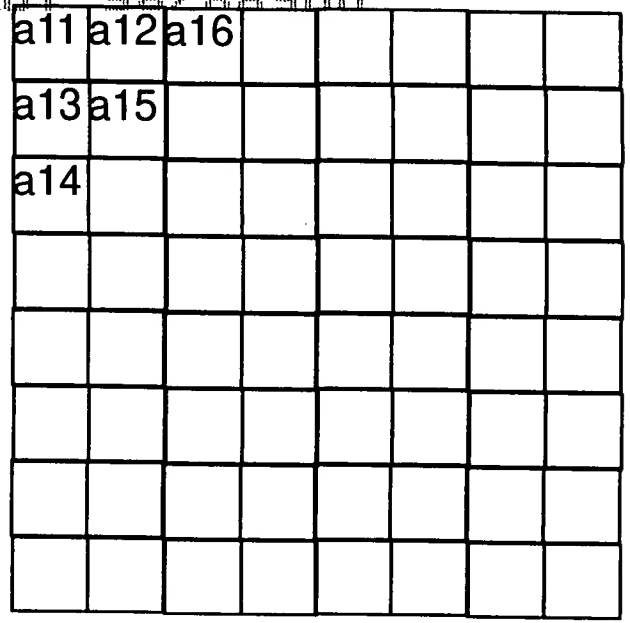
Bits of index vector X

aj is the j-th DCT coefficient of block a.
xaj is the bit corresponding to the quantization function chosen for DCT coefficient aj.

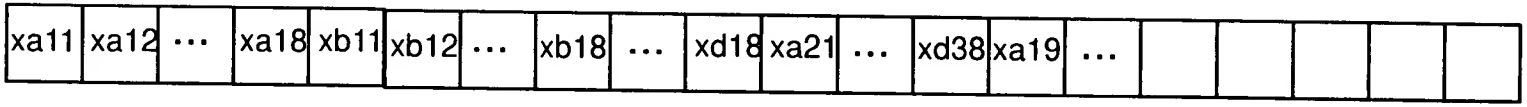
Figure 5a



Color image



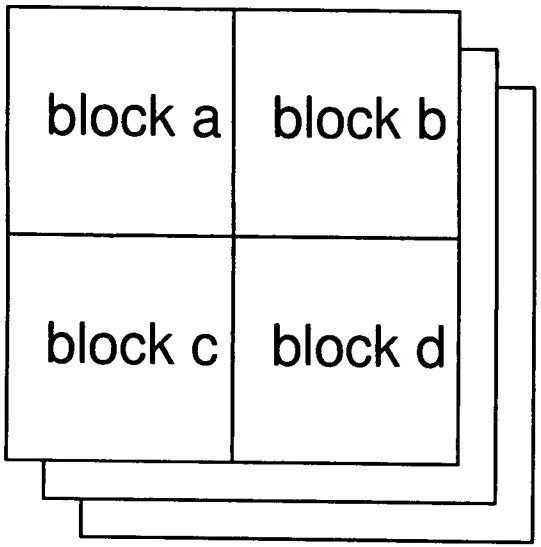
DCT coefficients of block a of color plane 1



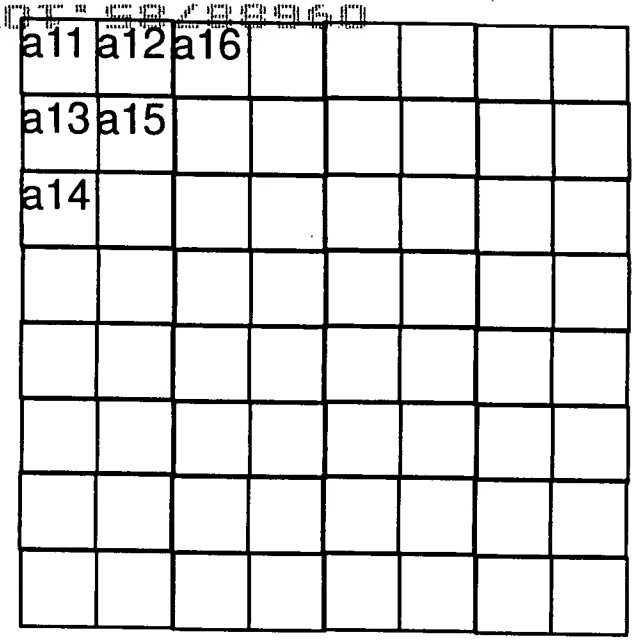
Bits of index vector X

aij is the j-th DCT coefficient of block a of color plane i.
xaij is the bit corresponding to the quantization function chosen for DCT coefficient aij.

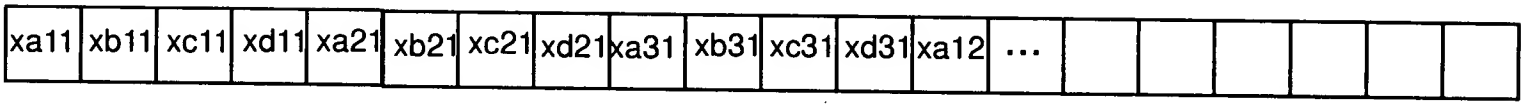
Figure 5b



Color image



DCT coefficients of block a of color plane 1



Bits of index vector X

aij is the j-th DCT coefficient of block a of color plane i.
xaij is the bit corresponding to the quantization function chosen for DCT coefficient aij.
